# Lwetunga Forest Village Story Project

Immerse yourself in the beauty of Uganda's natural wonders, connect with its diverse cultures, and make a positive impact on conservation efforts. We work with communities to exercise agroforestry. Agroforestry-the use of trees in farming-benefits both farmers and the environment. We recognise the role that trees can play in feeding a community and we discovered an opportunity to a meliorate the situation of hungry communities.

## **Lwetunga Forest Village offers activities of:**

- Guided forest trek to explore the rich biodiversity, with opportunities for wildlife spotting and birdwatching.
- Cultural exchange with indigenous communities, participating in traditional activities and enjoying a homestay experience. Optional volunteering for tree planting activities.
